Introducing Mirus Digital Desktop FilmPrinters™

IMAGINE IT. CREATE IT. SEND IT TO A MIRUS FILMPRINTER.

It's so easy... if you can make a laser print you can make a slide. Just send your file to a Mirus FilmPrinter and in minutes it's recorded on 35mm film, ready to be processed at your local lab. **No more hassling** with service bureaus over last minute changes and rush charges—you control the deadlines. Get your slides in **hours instead of days** and at a fraction of the cost.

It's a mere **50¢ per slide**. Compare this with outside services that charge anywhere from \$5 to \$200 per slide, and you can see how it will pay for itself in no time.

Plus, Mirus FilmPrinters make **great slides**. Our renowned 36-bit technology, 4K and 5K resolution recording, double-hit exposure, and user-friendly features set standards for quality and convenience in slidemaking—all in a **compact size** that fits right on your desk.

The best results: Now, you'll get even better slides with the new Kodak Ektachrome Electronic Output Film 100 (EOF). Mirus and Kodak worked to develop this film specifically for FilmPrinters and recorders. The new EOF gives increased sharpness, color saturation, highlight and detail.

Mirus, Kodak and other leading companies are working together on projects like the EOF as part of ongoing efforts to bring the digital imaging revolution to you at a price you can afford.

PROCESS AND PRESENT IT.

Act Now and save up to **\$1,000 off** a Mirus FilmPrinter. Call **1-800-942-9770** or e-mail Mirus at info@mirus.com. For additional information, check out Mirus on the web at www.mirus.com.
